jeremy@swinarton.com

I am a **full-stack software developer** and **devops engineer**. I can build, test and deploy solutions to big problems in web environments, using a variety of languages and tools.

Skills

- Adept at building web application software using a range of tools, languages and programming styles.
- Capable of managing the entire lifecycle of software development, including version control, code review, continuous integration and delivery, unit and end-to-end testing and debugging.
- Strong leadership and communication skills.
- Experienced graphic designer, writer and copyeditor.

Software Toolkit

Work Experience

Software engineer and UX designer—Coreopsis May 2018–November 2018
Full-stack developer and designer for a legal web app written in Python/Django. I managed the complete lifecycle of building new features, from UX design to front- and back-end development, to building devops tooling and deployment.

Platform engineer—WE Charity June 2017–May 2018
Engineer for WE's SaaS platform. I worked alongside a talented team to build and deploy platform services to replace legacy components, ensuring that all new software is built using a modern stack (Python/Azure) and with best practices.

Software engineer — Kinetic Café Feb 2016 – June 2017
Polyglot engineer on multiple client projects with varying requirements and tech stacks, including: an API service and data-processing toolchain for the Reco iOS app, which was featured twice on the Apple App Store; a web-based mall mapping app for Ivanhoé Cambridge using Vue.js; and services for Kinetic's retail SaaS platform, written in Ruby and Elixir and serving APIs with GraphQL.

Full-stack web developer — Rubicon Project/Chango Feb 2013 – Sep 2015
Developer for chango.com. I rebuilt Chango's existing WordPress website using a modern toolkit (Python/Django). I also contributed to Chango's internal web dashboard, which was used by clients to manage their programmatic ad spend.

Freelance software developer/UI/UX designer—various clients 2008–present
Creator of award-winning web marketing, data visualization, and editorial projects. Clients include Al Jazeera English, the Toronto Star, Joist and Oxfam Canada.

Education

York University/Sheridan College Joint Programme in Design 2012
Honours Bachelor of Design (Member of Dean's Honour Roll)
